

## Magnetic Sheet Separator [floaters]

Series AA-221

- ❑ Magnetic sheet separators are used to create gap between oil struck & heavily piled up sheets.
- ❑ The magnetic separators induces similar pole forces to each plate in a stack, thereby creating repelling forces in each consecutive plate, causing their separation.
- ❑ Any size & shape of sheets can be separated by using number of floaters at certain interval.
- ❑ Magnetic sheet separators have stainless steel front cover.
- ❑ Selection of magnetic sheet separators depend upon stack height, flatness of the sheet, surface condition & thickness dimensions of the sheet.

### Specifications:

Sr. No	Cat. No.	Size in mm L X H X T
1	AA-2215	65 X 90 X 50
2	AA-2216	125 X 125 X 60
3	AA-2217	210 X 255 X 75
